

Notice of Study Completion

Grandview Beach and Paradise Point Township of Tay Schedule B Class Environmental Assessment

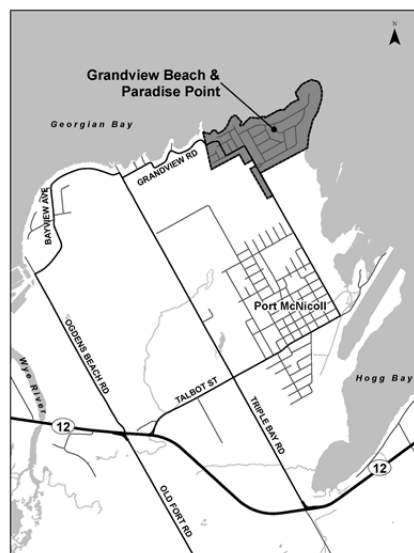

The Township of Tay has completed a Class Environmental Assessment (Class EA) that investigated opportunities to improve the water and wastewater services to properties in the Grandview Beach and Paradise Point community.

The Class EA study assessed the quality of drinking water and the effectiveness of wastewater treatment in the community, reviewed the planning and development freeze in place since the 1970s, and considered funding models to support the study recommendations.

Public and agency consultation was a key element of the process, and input was sought throughout the study to identify options to address the study findings. Based on that input, alternative strategies were evaluated to identify optimal community, environmental and economic opportunities.

What are the Next Steps?

The study results showed that the expansion of the existing municipal water and wastewater systems in Port McNicoll to the Grandview Beach and Paradise Point community is the preferred solution to the problem statement. The final report has been prepared and is available for public review in the following places:
