Building Department

Minimum Permit Fee

No Permit Fee shall be less than \$100.00, regardless of results calculated in accordance with Part 5.2 and/or Part 5.3 of the Building By-law.

Determination of Area Calculations for Permit Fees

For the purpose of calculating the cost of permits, the following method establishing square footage shall be used:

- 1.** Each floor area shall be measured between the outside surfaces of exterior walls, or between the outside surfaces of exterior walls and the centre line of Firewalls or Party Walls. For structures like mezzanines, decks/porches and loading docks, the area shall be measured between the platform edge to platform edge, or between the platform edge to an abutting wall face. The summation of these calculations shall be considered the Total Area.
- 2.** A basement or a crawlspace contained in whole below grade, and with no interior finishes installed, or where no Use is proposed shall not have a permit fee applied.
- 3.** All walkout basements in Dwellings shall have half of their Total Area calculated for the applicable permit fee.
- 4.** No deductions shall be made for openings within a floor, i.e. stairwells, elevator shafts, service shafts (ducts, etc.).
- 5.** A horizontal plane may be projected over sloping and stepped floors to determine floor area in lieu of actual surface area.
- 6.** Where an interior renovation with only minor changes to Structural, Life Safety, or Fire Prevention components is proposed, the applicable permit fee found in Part 5.3.1 of the Building By-law may be reduced to half the sum.
- 7.** The primary function or use of a tenancy shall determine the applicable fee or fees from Part 5.3.1 to floor areas within that suite or unit.
- 8.** In buildings of multiple suites or tenancy, where more than one fee from Part 5.3.1 of the schedule would apply in the Building By-law. A separate Total Area calculation shall be performed for each of the different occupancies, defined in Part 5.1.2 of the Building By-law. The appropriate fee shall be applied to this Total Area, with the summation of all fees resulting in the total Building Permit Fee.

Alternative Fee Calculations

Structures that are of an unusual shape, or where projects are unique in nature, and where the application of Part 5.3 Classes of Permits and Fee Index would be impractical, the Chief Building Official may utilize some, all, or a combination thereof, of the following criteria to determine the Building Permit Fee.

- > An estimation of staff time to be spent on the file. Based on,
 - > Plans Review/Clerical Processing \$60.00 per hour.
 - > Inspections, \$75.00 per Inspection performed.
- > Apply a fee, or combination of fees listed in Part 5.3 that in the judgement of the Chief Building Official, most closely reflects the proposed project.
- > \$12.00 per \$1,000 of Construction Value, apply fee based on construction value for each of the following - Groups A-F defined under the Ontario Building Code and farm buildings where construction costs have been provided.

Combined Permit Fees

- (1) Where a structure equipped with services or assemblies that are, either required by The Ontario Building Code, or are of a voluntary installation, and for which a fee has been listed in Part 5.3 of this Schedule, the summation of all applicable fees shall result in the total Building Permit Fee.
- (2) The fee for Heating shall only be charged when no other associated construction is proposed.
