

What would you like the Severn Sound Watershed Area to be in 40-years?

The Severn Sound Environmental Association (SSEA), along with its member municipalities, partners and supporters, are planning to develop a Sustainability Plan for the watershed for the year 2050. We are calling on the entire community to identify goals, objectives and actions needed to support the sustainability vision for the watershed.

Tell us what matters to you and your community to design the future!

Learn more about the sustainability plan.
