

**THE TOWNSHIP OF TAY
PUBLIC WORKS DEPARTMENT
NOTICE OF COMMENCEMENT
CLASS ENVIRONMENTAL ASSESSMENT
Victoria Harbour Wastewater Treatment Plant**

The Township of Tay is undertaking a Class Environmental Assessment of the Victoria Harbour Wastewater Treatment Plant (WWTP) in the community of Victoria Harbour. The purpose of this study is to assess wastewater treatment alternatives and various outfall locations to address current operational needs and future growth needs in the community and to select the preferred alternative. The study will also assess biosolids management needs for the Township.

This study follows the process outlined in the Municipal Engineers Association's (MEA) "Municipal Class Environmental Assessment" (as amended in 2007) and is designated as a Schedule "C" undertaking.

Public input and comment are invited for incorporation into the planning and design of this project. Two Public Information Centres (PICs) will be held as part of this project. Notices of the dates and locations of the PICs will be sent in advance to interested parties, and advertised in local papers and on the Township's website.

Comments received from the public will be considered in finalizing the upgrade requirements and in the development and evaluation of alternative design concepts. With the exception of personal information, all comments will be part of the public record.
