

**THE TOWNSHIP OF TAY
PUBLIC WORKS DEPARTMENT
REPEAT OF PUBLIC INFORMATION CENTRE No. 2
CLASS ENVIRONMENTAL ASSESSMENT
Victoria Harbour Wastewater Treatment Plant**

The Township of Tay is undertaking a Class Environmental Assessment of the Victoria Harbour Wastewater Treatment Plant (WWTP) in the community of Victoria Harbour. The purpose of this study is to assess wastewater treatment alternatives and alternate outfall locations to address future growth needs in the community, and to select the preferred alternative and the preferred design concept. The study will also assess biosolids and septage management needs for the Township.

Due to the public interest in the project demonstrated by the attendance at the PIC held on August 26th, the Township will be repeating this PIC to ensure that all members of the public have an opportunity to attend and discuss the project with the consultants and Township staff. PIC No. 2 will present details regarding the preferred outfall location and the Alternative Design Concepts being considered to upgrade and expand the existing Victoria Harbour WWTP. Results of a preliminary evaluation of these alternatives will be presented, along with the recommended Alternative Design Concept.

The repeated PIC No. 2 is scheduled for:

Date: Wednesday, September 22nd, 2010

Time: 6:30 pm to 8:30 pm

Location: Council Chambers, Municipal Office, 450 Park St., Victoria Harbour

A presentation will be made at 6:30 PM and members of the consulting team and Township staff will be available from 7:00 to 8:30 to answer questions and discuss issues related to the project. Comments received from the public will be considered in finalizing the selection of the Preferred Alternative Design Concept. With the exception of personal information, all comments will be part of the public record.

Upon completion, an Environmental Study Report (ESR) will be prepared to document the planning process followed, including conclusions, recommendations, and how public input was received and considered. The ESR will be available for public review for a period of 30 calendar days. The public will be notified of the date, time, and location of the filing of the ESR at the appropriate time through similar newspaper notices and letters mailed to those in the project's contact database.

For further information, please contact one of the individuals identified below. Thank you for your participation in this study.
